

ARBOR BREWING HITS MICHIGAN'S BEER BULLS-EYE WITH ASSIST FROM PP-R PIPING SYSTEMS

PROJECT:

Arbor Brewing Company
Geothermal, Radiant Heating
& Cooling, & Domestic Water
Supply

PRODUCTS:

aquatherm green pipe®
aquatherm blue pipe®

LOCATION/DATE:

Ypsilanti, MI
Spring 2011

THE CHALLENGE

Ownership sought the most environmentally friendly piping system for the geothermal heating and cooling system serving the beer cave

THE SOLUTION

Aquatherm provided a leak- and maintenance-free system that has run smoothly for four-plus years – and it's the brewery's preferred pipe system going forward

"The way we were able to cut and connect this pipe it was a lot cleaner. With Aquatherm, it's just time and temperature, and there's a much shorter curing time, there's no risk of drips and glue to break off and get in your process lines."

– Dan Peron, Director of Brewery Operations, Arbor Brewing Company Microbrewery, Ypsilanti, MI

AQUATHERM ADVANTAGES

- Ownership was drawn to PP-R's lifecycle benefits vs other pipe systems
- Aquatherm provided labor time savings thanks to heat fusion connections
- Heat fusion eliminated mechanical or glued connections, which was essential since most of the system is underground or in concrete
