

ALABAMA BREWERY TAPS AQUATHERM FOR FIRST NORTH AMERICAN FOOD-GRADE APPLICATION

Alabama brewer finds a leak-free, sustainable way of transferring signature suds and glycol

PROJECT:

Avondale Brewing Company,
Food Grade Beer Transport,
Chilled Water, Glycol

PRODUCTS:

aquatherm green pipe®
aquatherm blue pipe®

LOCATION/DATE:

Birmingham, AL
November 2014

THE CHALLENGE

The owners were looking for a better way of transferring their beer from one building to another

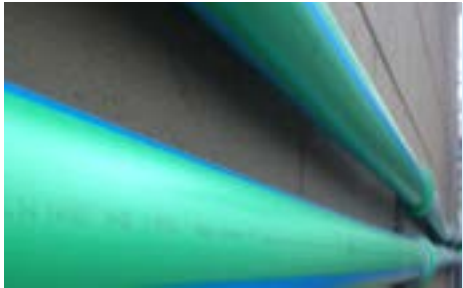

THE SOLUTION

Aquatherm Pipe was a perfect fit because it is an environmentally friendly pipe with a NSF approval for use on food grade applications

“Being that [the Aquatherm Green Pipe] is food-grade material, it should not be susceptible to harboring bacteria, and with proper cleaning and sanitation should perform flawlessly”

—Kade Miller, Brewer, Avondale Brewing Co., Birmingham, AL

AQUATHERM ADVANTAGES

- Ownership realized significant materials and labor cost savings by using Aquatherm instead of steel
- Aquatherm Pipe won't corrode, scale, wear out or clog—even after years of use, and is ideal for direct bury applications
- Aquatherm Piping Systems are completely free of heavy metals and toxic chemicals, which means they won't leach any trace chemicals
