

POND GOES GREEN - AND SAVES IT TOO

AQUATHERM ADVANTAGES

- The experienced plumbers saved considerable time installing PP-R versus copper
- PP-R's natural R-value reduced the amount of insulation necessary
- Pre-fabricated connections and manifolds further reduced labor time

PROJECT	PRODUCTS USED	LOCATION/DATE
Carl Pond Plumbing Headquarters, HVAC and domestic water	Climatherm®	North Salt Lake City, UT 2007

THE CHALLENGE

The owner sought cutting-edge environmentally friendly technology for his headquarters/showcase.

THE SOLUTION

Roughly 1,000 feet of 1 ½-inch to 2-inch Climatherm was installed for HVAC and over 400 feet of ½" to 1" Greenpipe was also installed. The installation has served as an excellent showcase to potential customers.

"...The project would have taken about four weeks [instead of only three] to run using copper and with copper prices at an all-time high, Aquatherm was considerably less expensive."

- CARL POND
