

## CHICAGO HOTEL SAVES LOTS OF GREEN (\$\$\$) USING AQUATHERM BLUE PIPE®

Aquatherm specification support specialist Ra Puriri is a strong guy, but he couldn't do this with steel. The light weight of Aquatherm compared to black pipe was a huge benefit on this job.

### PROJECT:

Hyatt Place Chicago-South/  
University Medical Center,  
Heating

### PRODUCTS:

**aquatherm blue pipe®**

### LOCATION/DATE:

Chicago / March 2012-August  
2013

### THE CHALLENGE

Finding a pipe material for a heat pump system that would save on material and labor costs while delivering a better solution

### THE SOLUTION

Aquatherm Blue Pipe® saved the owner time and money during installation while building a longer lasting, corrosion-free system

"I really liked the fact the piping has thermal properties and again how light it was... We had significant cost savings by using the Aquatherm product and we were able to pass that savings along to the building owner."

— Ryan Kerrigan, Vice President, Sherman Mechanical Inc., Cary, IL

### AQUATHERM ADVANTAGES

- The installer saved the owner \$25,000 in labor costs by using Aquatherm instead of black pipe
- Additional savings were realized since they didn't have to rent a crane to get equipment to the 6th floor
- Aquatherm piping systems possess an inherent insulation value
