

FLORIDA DATA CENTER FINDS SECURITY WITH AQUATHERM PIPING SYSTEM

AQUATHERM ADVANTAGES

- Aquatherm pipe required less insulation because of its inherent R value
- The installers at CxP realized that Aquatherm pipe is lighter and safer to work with compared to steel
- The installation took only a month, thanks to the speed of heat fusion, which saved massive amounts of time vs. steel

PROJECT

CxP Data Centers,
Chilled Water

PRODUCTS

aquatherm blue pipe®

LOCATION/DATE

Jacksonville, FL,
December 2013 -
January 2014

The Challenge

CxP data centers needed to replace its chilled water system with a reliable, leak-free option in a few weeks

The Solution

CxP facility designers decided to use Aquatherm pipe and were pleased with the installation which exhibited no leaks during testing of the 500 individual joints

“I was surprised by how quickly and easily the pipe and fittings could be joined without using an open flame and the hazard that accompanies it. It was also impressive how easy it was for them to put in tees or other fittings for future alterations or expansion, and when you combine that with its superior thermal value—it was a benefit and provided a cost advantage.”
