

# MAJOR PHARMACEUTICAL MANUFACTURER SOLVES PIPING ISSUES WITH AQUATHERM GREEN PIPE

## AQUATHERM ADVANTAGES

- Aquatherm Green Pipe is the only plastic piping system approved for unrestricted commercial potable water use in the state of Massachusetts
- Aquatherm was installed to improve water quality and provided material and labor savings
- Time was precious and Aquatherm was installed dramatically faster than metal pipes due to heat-fusion
- Aquatherm fusion outlets make expansion and/or changes within the piping system easier and allow for flexibility

PROJECT	PRODUCTS	LOCATION/DATE
A Major Pharmaceutical Manufacturer, Domestic Water Supply Retrofit	<b>aquatherm green pipe®</b>	New England, April 2013

### The Challenge

The pharmaceutical manufacturing facility required a domestic water piping retrofit due to extreme corrosion

### The Solution

Aquatherm pipe was selected because it not only reduced the environmental impact, but it also fit into the tight installation time frame

“There were five of us prefabbing back at the shop. The weekend installation was a 10-hour day and a 14-hour day. We certainly would have had more man hours if we were soldering or welding; a lot more with welding, probably 40 percent more.”

- Mark Terry, Vice President of Plumbing Services, DECCO, Bookline, NH
