

# WHEN QUALITY MATTERS—MAIN STREET BREWERY SELECTS AQUATHERM PIPE FOR ITS BREW HOUSE

## AQUATHERM ADVANTAGES

- The highly engineered Aquatherm pipe provided material savings compared to copper piping
- Aquatherm pipe is nontoxic and corrosion-resistant, keeping the materials that flow through the pipe system clean and unaltered
- The inherent R-value of Aquatherm pipe eliminated the need for insulation on MSB's hot and cold water pipe

PROJECT	PRODUCTS	LOCATION/DATE
Main Street Brewery, Domestic Water and Glycol System	<b>aquatherm green pipe®</b> <b>aquatherm blue pipe®</b>	Vancouver, BC, August 2013

### The Challenge

Main Street Brewery needed a piping system that could reliably transport the precious, filtered water and expensive glycol without leaks while also allowing for easy expansion

### The Solution

MSB owners selected Aquatherm pipe for their systems and it ended up providing labor savings of at least 30%

“Never had one leak when we tested it. I can’t imagine a system of that size in any other pipe material not having a leak. There’s always a pinhole or a joint leaking somewhere.”

-Barry Murray, Owner,  
Neighbourhood Plumbing, Vancouver, BC
