

GREEN AND BLUE (PIPE) TAKE HOLD IN THE LAND OF REDS AND WHITES

AQUATHERM ADVANTAGES

- Aquatherm pricing is very stable unlike the volatile pricing of metal pipes
- Substances inside Aquatherm pipe are able to retain their temperature more easily than metal pipes thanks to the inherent R-value
- The installers really liked that there were no open flames, fumes or chemicals when fusing the pipe, making it safer and faster
- Aquatherm's heat-fused connections can absorb shock and stress such as water hammer and moderate seismic activity

PROJECT	PRODUCTS	LOCATION/DATE
Multiple Wineries, Domestic Hot and Cold Water, Nitrogen Gas, Compressed Air	aquatherm green pipe® aquatherm blue pipe®	California Wine Country, June 2012 to present

The Challenge

Young Inglewood Vineyard and others including: Bogle Vineyards, Kelham Winery, Gamble Estate, and Larkmead Winery, needed a highly reliable piping system that could be seamlessly integrated into their plumbing and mechanical systems

The Solution

Aquatherm pipe was selected as the quickly and easily installed piping solution for a variety of applications including compressed air, domestic hot/cold water and nitrogen gas

“The ease of installations in retrofit situations is a real advantage; you don’t have to solder overhead. And the reduced expansion and contraction is a plus compared to all other plastics.”
