

ENGINEERING FIRM SELECTS, INSTALLS AQUATHERM PP-R PIPE FOR THERMAL-STORAGE SYSTEM

PROJECT:

OCI Associates Inc.,
Chilled Water and Glycol

PRODUCTS:

aquatherm blue pipe®

LOCATION/DATE:

Maitland, FL
Summer 2015

THE CHALLENGE

OCI needed a cooling system piping solution that would meet their stringent cost and time requirements

THE SOLUTION

Getting trained and certified on Aquatherm pipe installation and doing the work themselves saved \$85,000—while also meeting a tight timeline

“We have never done this before, obviously. But the Aquatherm is a lot more forgiving than other kinds of pipe. For a bunch of weekend warriors, it made our life easy. There was no way we would have been able to do what we did in the time we had with steel piping.”

— Jason Smith, Director of Mechanical Engineering, OCI Associates Inc., Maitland FL

AQUATHERM ADVANTAGES

- Despite this being the OCI's first Aquatherm installation, they didn't have a single fusion weld fail
- The design team liked that Aquatherm Blue Pipe can be direct buried without extra insulation
- Aquatherm Blue Pipe won't corrode or weaken over time
