

CRAFTSMEN'S SKILL WITH AQUATHERM ELEVATES NEW RESIDENTIAL BUILDING

PROJECT:

One-Six Multi-Family Residence
HVAC, Domestic Water

PRODUCTS:

aquatherm green pipe®
aquatherm blue pipe®

LOCATION/DATE:

Calgary, AB, Canada
Spring 2017

THE CHALLENGE

Ownership sought a dependable piping system that would deliver a good total installed cost

THE SOLUTION

A skilled and experienced team delivered a long-lasting, dependable, and aesthetically pleasing piping system... that delivered delivered many other benefits

"There were some really tricky custom fittings we could only make in Aquatherm, because we knew it was light enough that our crews could then get it in place. The number of welds we did offsite with Aquatherm were pretty extensive, and if we had been using steel the number of welds would have been mind-boggling."

-David Muncaster, Vice President, Nu-Mun Contracting Ltd., Calgary, AB

AQUATHERM ADVANTAGES

- The lighter weight (and the ability to custom-fabricate offsite and transfer to the site) presented considerable labor and cost savings over steel pipe – an estimated savings of 50%
- The mechanical contractor appreciated being able to offer the owner a piping system with a service life of 60-plus years, low operating and maintenance costs, and a low likelihood of jobsite theft
- Unlike metal pipe, Aquatherm PP-R piping systems require no open-flame welding or solder, so no flame watch was required

we've got a pipe for that
