

## FOR THE LOVE OF BEER

### PROJECT:

Smith & Lentz Brewing Company  
Chilled Water

### PRODUCTS:

**aquatherm blue pipe®**

### LOCATION/DATE:

Nashville, TN  
Fall 2015

### THE CHALLENGE

A startup brewery needed to save as much money as possible and find a piping system that wouldn't crack under extremely cold temperatures

### THE SOLUTION

Aquatherm's corrosion-resistant qualities and 10-year warranty give university leadership peace of mind

"Copper is more expensive, harder to work with, and it doesn't have a good R-value. Since PVC becomes really brittle when it gets cold, that was not a viable option for us either. We picked Aquatherm because of the price, R-1 insulating value per inch of material, and the ease of installation."

—Adler Lentz, Co-owner, Smith & Lentz Brewing Company, Nashville, TN

### AQUATHERM ADVANTAGES

- Using Aquatherm instead of copper saved about \$12,000 on upfront costs
- Aquatherm's R-1 value per inch ensured the piping wouldn't crack or break when used for the glycol system
- Aquatherm with its heat-fusion technique, was easy even for the owners to install
