

GREEN, HIGH-END CONDOMINIUM DEVELOPMENT IN
KELOWNA, BC, BENEFITS FROM PIPING ALTERNATIVE

AQUATHERM ADVANTAGES

- Considerably cheaper than copper and no concerns about jobsite theft
- Resistance to aggressive chemicals
- PP-R was available for full pressure testing much quicker than solvent welding

PROJECT	PRODUCTS USED	LOCATION/DATE
Southwind at Sarsons, Potable and HVAC Piping	Aquatherm Greenpipe®, Climatherm®	Kelowna, BC Spring 2008

THE CHALLENGE
The design/build contractor didn't want to use CPVC due to chemicals and joint strength, or copper due to aggressive water

THE SOLUTION
Rust- and corrosion-proof, and chemical-free, Aquatherm was a perfect fit

“We really didn't consider any other material. Even for the larger sizes, the pipe sizing could be reduced from traditional material by virtue of the higher velocities allowed in the Aquatherm.”

- Martin Paul, P.Eng LEED® AP
