

AQUATHERM PIPE DOES DOUBLE DUTY—FIRST AT SPONGE PLANT, THEN AT ANOTHER FACTORY

AQUATHERM ADVANTAGES

- PP-R, unlike the steel it replaced, does not corrode or scale
- The lighter weight (75% less than steel) made installation easier
- The 10-year warranty covering parts, labor, and incidental damages offered confidence in trying a new piping system

PROJECT	PRODUCTS USED	LOCATION/DATE
Mapa Spontex Inc. Manufacturing Plant, HVAC	Aquatherm Blue Pipe®	Columbia, TN November 2009

THE CHALLENGE

Use a corrosion- and rust-resistant piping system that could handle acidic chemicals and require no open flames during installation

THE SOLUTION

Aquatherm performed superbly at Spontex—and when the plant closed, the pipe was reused at another factory for pure water and compressed air

...“They knew that the product would be resistant to the bacterial and rust problems that had plagued the steel piping in the plant. The steel piping had been causing considerable problems with corrosion and sweating, and with Aquatherm you have none of that.”

- Danny Lee, Project Manager, Evers Construction Co., Lawrenceburg, TN
