

SPORT COURT FLOORING MANUFACTURER SCORES WITH INDUSTRIAL COOLING PIPING SYSTEM

AQUATHERM ADVANTAGES

- PP-R won't react with water or most dissolved chemicals, so it is unaffected by corrosion, scaling and erosion – problems that had plagued Sport Court with piping failures
- Aquatherm PP-R piping systems have a 10-year warranty and are made to last for more than 60 years
- The PP-R material also has natural insulation properties, meaning less insulation is needed to meet current energy codes

PROJECT

Sport Court
Manufacturing Facility,
New Chilled-Water
System Installation

PRODUCTS

aquatherm blue pipe®
aquatherm green pipe®

LOCATION/DATE

Salt Lake City
June 2013 - Winter 2014

The Challenge

Sport Court needed a state-of-the-art facility with piping that could handle water hammer and wouldn't get plugged up with lime, scale, and rust

The Solution

Aquatherm pipe was used for chilled water and compressed air applications to cool the large plastic injection-molding machines

"The big plus to Aquatherm is that I haven't had one leak—not one—which I cannot say of anything I've ever done with black pipe. It's phenomenal; I think Aquatherm is going to be the new standard."

- Steve Leake, Facility Manager, Sport Court, Salt Lake City
