

# OVERCROWDED COUNTY JAIL FINDS BETTER VALUE WITH AQUATHERM

## PROJECT:

Tooele County Detention Center, Domestic Water

## PRODUCTS:

**aquatherm green pipe**<sup>®</sup>  
**aquatherm blue pipe**<sup>®</sup>

## LOCATION/DATE:

Tooele, UT,  
December 2011

## THE CHALLENGE

Ownership sought a cutting-edge pipe system that would help reduce material and labor expenses

## THE SOLUTION

Aquatherm pipe was not only less expensive than copper, but due to the speed of installation, labor costs were reduced by roughly 25%

“We picked it up pretty quickly, once I started seeing how it goes together, I was happy with Aquatherm and okay with using it right from the beginning.”

– Craig Thornock, Superintendent, Envision Mechanical, Ogden, UT

## AQUATHERM ADVANTAGES

- Heat fusion connections provided roughly 25% savings compared to steel
- Ownership embraced the 10-year multimillion dollar warranty covering product liability, labor, personal injury and property damage
- While copper was used for smaller diameter piping sizes, Aquatherm was used for the majority of the project, saving 20-35% on the larger diameters
