

THE WISE MAN'S CHOICE

PROJECT:

Wise Man Brewery
Glycol

PRODUCTS:

aquatherm blue pipe®

LOCATION/DATE:

Winston-Salem, NC
January 2017

THE CHALLENGE

A beer-hobbyist-turned-professional needed a glycol piping system for the craft brewery he wanted to build inside a 1920s brick wholesale facility

THE SOLUTION

After seeing first-hand that Aquatherm's heat-fusion welding technique creates perfectly homogeneous joints without borders, seams, or bubbles, the brewery owner didn't want to consider any other piping product

"[Aquatherm PP-R piping systems] look better and are simpler to install. I'd like to see more engineers specify them."

—Jim Fields, Vice President, Superior Mechanical, Kernersville, NC

AQUATHERM ADVANTAGES

- Aquatherm PP-R piping systems proved simple to install, even for first-timers
- A two-man crew laid more than 600 ft of Aquatherm Blue Pipe in just a few days
- Recyclable Aquatherm piping installs cleaner and neater than most systems
