

## SOMETHING OLD, SOMETHING NEW, SOMETHING BREWED, SOMETHING BLUE

*Aquatherm Blue Pipe® adds a strikingly modern touch inside the 100-plus-year-old building that has been reborn as Drop the H Brewing Co.*

### PROJECT:

Drop the H Brewing Co.  
Glycol lines

### PRODUCTS:

**aquatherm blue pipe®**

### LOCATION/DATE:

Pittsburg, KS  
June - September 2019

### THE CHALLENGE

The owners of this new brewpub in a 100-plus-year-old building wanted durable and reliable glycol lines that also looked great

### THE SOLUTION

Aquatherm Blue Pipe® has been proven in breweries across North America, and it added a nice element of color that really pops against the brick walls of the pub

*"I wanted a system that was bulletproof reliable, and I really liked Aquatherm's warranty and its ease of operation. Although I could have gone cheaper upfront, I know that cheaper is not always what's best in the long run."*

— Mark McClain, Owner, Drop the H Brewing Co., Pittsburg, KS

### AQUATHERM ADVANTAGES

- Reliable and virtually leak-free  
Aquatherm pipe offered the worry-free dependability that this brewer wanted for his first brewpub
- The mechanical contractor's installation team was impressed by Aquatherm's light weight, speed of installation, and the fact that zero leaks were found during the pressure test
- In a brewery designed to show off the brewing process, looks were important to the owner, and he loves the colorful Aquatherm pipe
