

## THE FOLLOW-UP FILES: AN EPIC SAGA AT EPIC BREWING

*Since its opening in 2012, Epic Brewing Co. in Denver has expanded from eight fermentation tanks to 27. Branch lines with versatile Aquatherm pipe have been an integral part of that expansion.*

### PROJECT:

Expansion of brewing operations  
Glycol lines

### PRODUCTS:

aquatherm blue pipe®  
aquatherm green pipe®

### LOCATION/DATE:

Denver, CO  
2012 - 2019

### THE CHALLENGE

A fast-growing brewery needed to expand its brewing operations to keep up with increasing demand

### THE SOLUTION

Aquatherm pipe enabled this brewer to more than triple its number of fermentation tanks with no downtime

"If you ever have to do a repair with Aquatherm it takes a quarter of the time it would take to weld steel or braze copper."

— Todd Ramer, Service Manager, Major Heating & Air Conditioning, Denver

### AQUATHERM ADVANTAGES

- Aquatherm pipe's chemical resistance makes it the ideal material to transport glycol and many other chemicals
- The light weight of Aquatherm pipe meant that a single installer could install the pipe, even overhead, much faster than steel or copper
- It is easy to tap into existing lines and add new lines using saddle fusions with Aquatherm pipe

we've got a pipe for that
