

## AQUATHERM HELPS GROWING HOSPITAL REACH FOR THE (BIG) SKY

*The fabrication and installation skills of Williams Plumbing's team are evident throughout the Aquatherm piping installation at Bozeman Health Hospital.*

### PROJECT:

Bozeman Health Hospital  
Chilled Water, Domestic Water

### PRODUCTS:

aquatherm blue pipe®  
aquatherm green pipe®

### LOCATION/DATE:

Bozeman, MT  
Fall/Winter 2020

### THE CHALLENGE

At a growing hospital, engineering recommendations designed to reduce cost were made for the chilled and domestic water piping

### THE SOLUTION

Aquatherm installations can require less manpower than carbon steel installations, contributing to what is often a lower total installed cost than steel

For a behind-the-scenes look into Williams Plumbing and Aquatherm pipe, check out this video: [bit.ly/2NV6UJd](https://bit.ly/2NV6UJd)

"In a hospital everything is packed tight and you're not always able to get a welder or a torch in those little spots. With Aquatherm, we're usually able to fabricate spools on the spot that will accommodate any space we might be dealing with."

— Tom Harmon, General Superintendent,  
Williams Plumbing, Bozeman, MT

### AQUATHERM ADVANTAGES

- The lighter weight and ability to custom-fabricate offsite presented considerable labor- and cost-savings over steel pipe
- Aquatherm's clean, heat-fusion connections, which don't require any gas, glues, or solder to join the pipes and don't create any dust or metallic shavings, are an added benefit in a hospital environment
- Unlike metal pipe, Aquatherm piping systems require no open-flame welding, so no hot-work permits, welding smoke mitigation, or flame watch were required
