

POLYPROPYLENE PIPING PERFECT FOR PREFABBED PLUG-AND-PLAY 'PODS'

Thanks to its light weight, ability to be custom-fabricated off site, and availability as Revit files, Aquatherm pipe is an integral part of Harvey Plumbing & Heating's modular mechanical room "pods."

PROJECT:
Modular Mechanical Rooms
HVAC

PRODUCTS:
aquatherm blue pipe®

LOCATION/DATE:
Bozeman, MT
2019 – ongoing

THE CHALLENGE
Rugged terrain, difficult weather, and long travel distances made traditional mechanical room construction a challenge in remote ski-resort homes

THE SOLUTION
Prefabricated "pods" equipped with Aquatherm pipe allowed entire mechanical rooms to be built in a controlled environment and shipped ready to install

"Aquatherm has proven itself over the years. When it's installed correctly and the fusions are done properly, the margin for error is zero—you simply don't have any leaks."
— Bob Harvey, owner, Harvey's Plumbing & Heating, Bozeman, MT

AQUATHERM ADVANTAGES

- The ability to custom-fabricate Aquatherm pipe makes the construction and transportation of these self-contained pods possible
- Aquatherm was among the industry leaders in ensuring that all of its product families and parts are available in Revit, a key factor in designing these modular pods
- Aquatherm's fabrication facility can custom-build any spools or manifolds that the contractor's fab shop doesn't have the manpower or tools to build
